

Dear partners

The global pandemic of COVID-19 and the devastating situation around the world, making us all aware of crucial importance of healthcare personnel even more than ever. In some regions, the medical resources are limited and healthcare professionals are required to perform medical procedures outside of their experience.

Below is the list of our simulators used for in-hospital certification. We hope we can contribute to maintain safe and quality health care service even when the system is facing new roles.

Medical simulators to certify clinical skills

MW13 Difficult Airway Management Simulator
For intubation to patients with breathing difficulties

M99 Arterial Puncture Training Wrist
To obtain arterial blood sampling for gas analysis of critically ill patients

MW18 Ultrasound-Guided PICC Training Simulator
For patients who requires immediate transfusion of medicine and nutrition

M93C/M93 UB CVC Insertion Simulator
For patients who requires immediate transfusion of medicine and nutrition

M43B Lumbar Puncture Simulator II
To check complication such as meningitis

Medical simulators for physical examination

MW28 Lung Sound Auscultation
Trainer "LSAT" ver.2
For initial assessment of patient
(adult) conditions

MW45 Nasopharyngeal Swab Collection Simulator
For detection of respiratory viruses
such as influenza and COVID-19
