

### Set of pediatric hands for practicing IV

Higher skills are essential in performing safe IV procedures on small infant hands with thin and soft veins that are difficult to find.

#### Features

1. The fingers and the back of the hand are flexible enough to be gripped or repositioned as in real-life procedures.
2. Two puncture sites on the back of the hand
3. Needle fixing procedure can be practiced.

#### Training Skills

- Pediatric dorsal veins injection
- Blood collection
- Intravenous infusion

#### Specifications :

Set Includes:
2 injection arm-hands (one-year-old)
2 injection arm-hands (three-year-old)
2 stands
1 circulation pump
1 jar of coloring powder (red)
1 spoon
1 plastic jar
1 plastic beaker
1 storage case
1 instruction manual
Manikin Size:
W23 x D6 x H5 cm (one-year-old)
W30 x D8 x H6 cm (three-year-old)
Replacement Parts:
(11350-010) 1 replacement injection arm-hand (three-year-old)
(11350-020) 1 replacement injection arm-hand (one-year-old)

\* Needle not included.

### Training in intradermal injection of forearm

This simulator provides training for intradermal injection to the inner forearm. Swelling of the skin will form when proper injection procedures are followed.

#### Features

1. Life-like touch and resistance of the injection site resembles the human arm
2. Injection pads are easily changeable.
3. No needle trace remains.

#### Training Skills

- Intradermal Injection

#### Specifications :

Set Includes:
5 puncture pads
1 forearm model
1 supporter stand
1 storage case
1 instruction manual
Manikin Size:
W20 x D20 x H8 cm
Replacement Parts:
(11346-010) 1 replacement puncture pad

\* Needle not included.
