

Fetus Ultrasound Examination Phantom "SPACE FAN-ST"

The SPACEFAN-ST provides high quality training for routine second trimester screening. This phantom contains a 23 week fetus with full anatomy placed in the uterus that can be scanned with 2D and 3D transducers. The oval shape phantom abdomen can be set in four different positions to enrich the training variation. Included life-size fetus model facilitates demonstration and three dimensional understanding.

Training Items:

Fetal size assessment: BPD, AD, AC and FL
 Confirmation of normal fetus situs
 Fetal anatomy assessment:
 head and brain, heart and lung, abdominal organs, spine and bones.
 Placental localization
 Evaluation of amniotic fluid volume

Anatomy

Uterus: amniotic fluid, placenta, umbilical cord, and a 23 week fetus (26cm).

Fetus: skeletal structure, brain with septum lucidum, heart with four chambers, lungs, spleen, kidneys, aorta, UV, UA, and the external genital.

Fetus Ultrasound Examination Phantom US 7

Set includes:

- 1 mother body torso
- 1 ultrasound pregnant uterus phantom
- 1 fetus demonstration model
- 1 carrying bag

phantom size: approx,40 x 29 x 22cm
 weight: approx,6kg

Specifications are subject to change.

BPD

AC

FL

Heart with Four Chambers

UV

Umbilical Cord

Breech Position
